

Sequoia Infrastructure Debt Fund Principal Adverse Sustainability Impacts Statement

The Sequoia Infrastructure Debt Fund (“SIDF”, “the Fund”) does not consider the principal adverse impacts (PAIs) of its investment on sustainability factors.

SIDF does not commit to make ‘sustainable investments’ per the definition of Article 2(17) of Regulation (EU) 2019/2088 (SFDR) and, as such, does not calculate or report the principal adverse impact (PAI) indicators for the Fund.

Nonetheless, the Fund recognises the importance of considering PAIs and is taking reasonable steps on making progress in the measurement of these metrics at the fund level. The Fund’s ability to measure and thus consider the adverse impacts is highly dependent on the availability and accuracy of data. We request relevant data from our investee companies upon origination and annually thereafter and embed covenants into loans, where possible, to mandate the provision of certain datapoints.

However, we invest predominantly in private debt with a skew towards smaller and mid-sized companies. Given the asset class and nature of our investments, the collection and reporting of PAI data at our investee companies are limited.

The integration of PAIs is further impaired by the current absence of reliable benchmarks or external data sources that could be used to reliably generate estimated data specific to our portfolio to comply with the PAI technical reporting requirements.

We cannot yet commit to a date by which we will be able to adequately consider such PAIs.
